Extrusion Process Extrusion Equipment Management Issues

How To Use This Index: Scroll down or use the bookmarks in the navigation pane at left to move to a new location in this index. Click on a [blue paper title](#) to view that paper. To return to this index after viewing a paper, click the “Previous Menu” bookmark in the navigation pane.

EXTRUSION PROCESS

[Isothermal Extrusion of Aluminum Alloys](#)

Masaya Takahashi and Takeshi Yoneyama 1

[Control of Grain Structure in Al-Mg-Si Extrusions](#)

Nick Parson, Simon Barker, Ann Shalanski, and Christopher W. Jowett 11

METAL FLOW

[Upset](#)

Christopher W. Jowett, Gary Hay, and Nick Parson 23

[Measurement of Pressure and Friction on the Container Surface During Aluminum Hot Extrusion](#)

Takeshi Yoneyama and Masaya Takahashi 39

[Study on Metal Flow in Extruded Billet](#)

Hideo Sano, Takashi Ishikawa, and Yoshinori Yoshida 47

[Metal Flow in Billets of Thin-Walled Extrudates](#)

Steven R. Claves, Kinga Janiszewska, Wojciech Z. Misiolek, and Wojciech Libura 55

[An Investigation of Size Effects in Miniature Hot Extrusion](#)

Fahad Al-Mufadi, Jay S. Gunasekera, and Frank F. Kraft 69

PERIPHERAL COARSE GRAIN

[Prediction of Static Recrystallization During Shaped Extrusion](#)

Zhi Peng and Terry Sheppard 79

Application of FEM to Modeling of Multi-Hole Die Extrusion Zhi Peng and Terry Sheppard	93
Analysis of Peripheral Coarse Grain Recrystallization in 6xxx Aluminum Alloy Extrusion William Van Geertruyden, Wojciech Z. Misiolek, and Paul T. Wang	107
Effects of Extrusion Parameters on Coarse Grain Surface Layer in 6xxx-Series Extrusions Elizabeth D. Sweet, Sally K. Caraher, Natalia V. Danilova, and Xinquan Zhang	115
Microstructural Gradients Near the Surface of Large 6xxx Aluminum Extrudates Steven R. Claves and Wojciech Z. Misiolek	127
Thermomechanical Modeling of Coarse Grain Formation of Al-Mg-Si Alloy During Extrusion Paul T. Wang, William H. Van Geertruyden, and Wojciech. Z. Misiolek	137
Prediction of Flow Stress and Recrystallization by the Finite Element Method During the Hot Extrusion of Aluminum Alloys Xianjian Duan, Terry Sheppard, and Xavier Velay	149
Prediction of Extruded Microstructures Using Experimental and Numerical Modeling Techniques Christopher Harris, Qiang Li, and Mark Jolly	159
METALLURGY/MEASUREMENT	
A Methodology for Quantitative Three-Dimensional Comparison of Experimental and Computer Simulated Microstructural Textures of 6xxx Aluminum Alloys Alexander R. Bandar, Steven R. Claves, Wojciech Z. Misiolek, Jing Lu, Antoinette M. Maniatty, and Karel Matous	169
Thermomechanical Effects of the Presence of Magnesium–Silicide in 6xxx Alloys at Extrusion Temperatures Roger N. Wright and Stephen Bartolucci	177
The Process of Gaining Extrusion Speed in 6xxx-Series Alloy Srimay Basu, Modar Al Mekdad, and Robert J. Todd	183
The Role of Metallography in the Characterization of Aluminum Extrusion Defects and Failures William L. Phillipson	197
TEMPERATURE MEASUREMENT	
Thermal Management Practices for Aluminum Extrusion Bill Barron and Tom Larrick	209
Integrated Extrusion Thermometry and the Measurement of Quench Rate Stuart F. Metcalfe	217
Real Temperature Parameters for Isothermal Extrusion Boris Shtarker, Eduard Hodos, and Ofer Yoely	225

EXTRUSION PROCESS

HyperXtrude/Process – Extrusion Process Optimization Software Mahender P. Reddy, Henry Bertolini, and Bob W. Biel	231
Effect of Section Thickness on Magnitude of Shape Variations During Cooling of Flat, Extruded Sections Martin Kristoffersen, Bjorn Andersson, and Artem Pilipenko	237
Studies of the Effects of Flow Imbalance on Shape Variations in Aluminum Extrusion by use of Lagrangian FEM Software Frode Halvorsen and Trond Aukrust	243
Evaluation of the Applicability of a Thermomechanical Model to Industrial Extrusion Experiments of AA6063 J. van de Langkruis, W. H. Kool, and S. van der Zwaag	253
A Manufacturing Flow-Path Simulation of the Microstructure Evolution of 6260 Aluminum Alloy During Extrusion Processing Lawrence A. Lalli and Ralph T. Shuey	259
Temperature Changes and Their Effect on Deformation During Extrusion Using FEM Isacc Flitta and Terry Sheppard	269
Results of an Investigation of Forward and Backward Extrusion with FEM Program QForm Sergei Stebunov, Nikolai Biba, Boris Moroz, and K. Müller	285

EXTRUSION EQUIPMENT

The Analysis of a Fatigue Failure of a Large Indirect Aluminum Extrusion Press Container Mantle Gerry J. Dail	295
---	-----

CONTAINER

Tool Steel and Design of Modern Containers for Extrusion of Light Metal Werner Hähnel and Manfred Herder	303
New Developments in the Design and Production of Container Assemblies Volker Wieser, Christof Sommitsch, Kurt Haberfellner, and Paul Lehofer	309
Thermal Control of the Extrusion Press Container Dennis Van Dine, Nazmi Gilada, Paul Robbins, Veikko I. Johannes, and Shigeyoshi Takagi ...	317

PRESSES

Catastrophic Failure: A 48-Hour Remedy Adam Cramlet and Rick Colden	323
Building a “Green Field” Extrusion Plant in the 21st Century Franco Libera and Chip Dollins	329

Front-Loading Technology with Tandem Cylinder Design for High Precision Extrusions	
Jürgen Sturm	335
Special Purpose Extrusion Press for the Production of Curved Profile	
Markus König and Uwe Muschalik	339
The Extrusion Press Line for 2024: A Forecast	
J.A. Kennedy	345
The Maintenance of Extrusion Presses With Specific Reference to Press Tooling	
Paul Robbins, Roger A.P. Fielding, and Veikko I. Johannes	353
CONTROLS	
Upgrading Extrusion Presses with Variable Frequency Drives	
Richard J. Rutkowski	361
Practical Non-Contact Temperature Measurement for Gas-Fired Billet Heating Furnaces	
David Jenista	367
Automation System for Production Optimization in Aluminum Extruder Plants, Based on Temperature Measurement and Control	
M. Pandit, W. Deis , T. Heger, H. Hengen, V. Rothweiler, and C. Jönsson	371
INDUCTION/BILLET TEMPERATURE	
Process Control Improvements for Single Billet Induction Heaters	
Stefan Beer	381
Induction Heating of Aluminum Billets Using Superconductors	
Niklas Magnusson and Magne Runde	389
Progress in Single-Billet Induction Heaters for Light-Metal Extrusions Works	
Willi Johnen	395
Improvements in Modern Heating Techniques for the Extruder	
Mike Whisken	405
Influence of Log and Billet Temperature Gradients on the Productivity of Extrusion Plants – Theoretical Considerations and Practical Results	
Bruno Mancini, Carl Kramer, and Werner Strehmel	411
QUENCH	
Advantages of a “Special Nozzles” Cooling Tunnel	
Enrico Freri	421
High Performance Quenching: Maximum Performance in the Minimum Space	
David Jenista	427
A New Horizontal Plant Concept for the T6 Treatment of Hard Alloy Extrusions	
Carl Kramer and Bruno Mancini	433

HANDLING

Flying Cut Puller Without Hand-Off

Francesco Gramaticopolo 439

Technical Textiles for Extrusion Handling Systems: Introducing High Tech While Avoiding Basic Mistakes

Doris Gaube 443

Innovative F.T.S. Three Puller – Automatic Stretcher System

Mauro Spizzo 449

AGE OVENS

Continuous Aging Oven for Extruded Profiles in Aluminum Extrusion Plants

Josep Barceló, Luis Las Heras, and Joan Delgado 453

“Moby Dick” Innovative Continuous Aging Oven for Extruded Profiles

Mauro Spizzo 459

MANAGEMENT ISSUES

The Effects of Globalization on the Aluminum Extrusion Industry

Bruno G. Rüttimann 463

GLOBALIZATION

Business Opportunities for Aluminum Extrusions in China

Benson Wu 479

Aluminum Profile Industry in China

Wang Zitao and Liu Jingru 487

High Quality Extrusions for Railway and Urban Transit Applications in China

Walter Engelmann, Guenther Uetz, and Jiang Sha 501

Aluminum Extrusion Industry in India – Challenges & Opportunities

S. S. Chokhani 509

Extrusion Equipment Upgrades for Maintaining Leadership Status in India

Jitendra Pal Singh 517

Aluminum Industry Standards for Extrusions

Pete Pollak 523

SAFETY AND EDUCATION

Extrusion Hazards and Risk Reduction

Alan Bartelt 531

The Aluminum Industry's Efforts to Prevent Molten Metal Explosions Seymour G. Epstein	547
Practical Application of the Future European Extrusion Safety Standard EN 14656 in an Existing Plant near Barcelona Jürgen Sturm	551
Bringing Technical Materials Engineering and Aluminum Information to the K-12 Community Kelly P. Wardlow and Wojciech Z. Misiolek	557
OPERATION MANAGEMENT	
Managing the Performance of Extrusion Plant Roger A. P. Fielding	565
Process and Quality Improvements by Implementation of ISO/TS 16949 in Extrusion Plants Walter Engelmann and Alexander Otte	571
The Nine Principles for Best-in-Class Quality Alexander Daniker and Brad Allen	577
Die Correction? Roger A. P. Fielding	581
Using the Feed-Forward Concept to Integrate and Optimize the Extrusion Process, Die Design, and Management Process Yean-Jenq (Henry) Huang	585
Technical Solutions for the Aluminum Extrusion Industry Subodh K. Das	593
Meeting Today's Market Challenges Through Strategic Equipment Investments Nicola Defendi	597

BILLET PROCESS AND EQUIPMENT

New Technology – Improving Billet Casting and Extrusion Performance David Schloz, Richard Kelly, and Gary Jones	1
---	---

BILLET CASTING

Advantages of Vertical Bonded Particle Filter Technology in Extrusion Billet Casting David V. Neff	15
--	----

The Ultimate Extrusion Scrap Remelt and Casting System Roger A.P. Fielding, D. Hugh Barnard, and George E. Macey	21
--	----

METALLURGY

Extrudability and Mechanical Properties of Alcan’s High Performance Al-Mg-Si Alloy Ram Ramanan, Alex Brassard, Greg Lea, Gary Hay, Christopher W. Jowett, and Nick Parson	27
--	----

Predictive Metallographic Assessment of Extrudability and Comparative Testing of 6xxx Aluminum Alloy Billets Richard M. Kelly, Paul F. Chaveriat, Kelly P. Wardlow, Steven R. Claves, and Wojciech Z. Misiolek	39
--	----

Performance of 6xxx Series Alloys Designed for Improved Extrudability and Strength Malcolm Couper, Barbara Rinderer, Xinquan Zhang, and John Heathcock	51
--	----

HOMOGENIZATION

- A Model of the β -AlFeSi to α -Al(FeMn)Si Transformation During Homogenization in 6xxx Alloys**
F.J. Vermolen, N.C.W. Kuijpers, C. Vuik, S. van der Zwaag, P.T.G. Koenis,
and K.E. Nilsen 57
- A Modern View of the Thermodynamics and Kinetics of the Magnesium-Silicide**
Presence in 6xxx Alloys
Roger N. Wright, Metin Usta, and Stephen Bartolucci 67

BILLET PROCESSING

- Use of Boron Nitride Coatings with Aluminum Casting Technology**
Stephan Rudolph, and Frank Reusch 77
- Almech: A Computer Program for Alloy Selection and Extrusion Process Improvement**
Jostein Røyset, Jan Anders Saeter, Ulf Tundal, Oddvin Reiso, Tanja Nyborg,
Elin Beate Bjørnbakk, Anne Lise Dons, and Thomas Hagelien 81
- Features of Extrusion of Al and Mg Alloys for Production of Billets with Improved Strength, Plastic and Technological Properties**
Rafail Shcherbel, Rustem Muratov, Valery Rybin, Vasily Kuchkin, and Ekaterina
Korzhavina 93

MOLTEN METAL TREATMENT

- The Pechiney Jetcleaner – New Equipment Technology for “In-Line” Treatment of Molten Aluminum Alloys**
John V. Griffin 97
- Techniques for Removing Sodium from Molten Aluminum**
Martin B. Taylor 103
- Benefits with Electromagnetic Pumping Technology in Extrusion Alloy Melting Furnaces**
Paul S. Campbell, Chris T. Vild, and Alan M. Peel 113
- The Casthouse Safety Program**
Michael Craig 121

EQUIPMENT

- Traveling Billet Homogenizing Furnace**
William R. Weyand 127
- Compact Type Remelt Plant for Contaminated Scrap Using Latest Melting Technology**
Franz Niedermair 135

DIE DESIGN AND TECHNOLOGY

- Effect of the Convex Die Geometry on the Process Parameters During Extrusion**
Pawel Kazanowski, Wojciech Libura, and Romana Sliwa 143

FINITE ELEMENT METHOD

Finite Element Method (FEM) Investigations for Practical Extrusion Issues -- Extrusion Process for Complex 3-D Geometries; Pocket Die Designs; Transverse Weld Phenomenon

Qiang Li, Chris Harris, and Mark R. Jolly 151

Analysis and Design Optimization of Aluminum Extrusion Dies

Mahender P. Reddy, Ravisankar Mayavaram, David Durocher, Håkan Carlsson, and Ola Bergqvist 171

Prediction of Material Flow Pattern in the Hot Extrusion of Aluminum Alloys by the Finite Element Method

Xavier Velay, Terry Sheppard, and Xinjian Duan 179

Microstructural Evaluation of Convex Die Extrudates

Heather M. Browne, Steven Claves, Pawel Kazanowski, and Wojciech Z. Misiolok 185

Experimental and Numerical Investigations of Aluminum Extrusion Through Pocket Dies

Dariusz Leśniak, Wojciech Libura, Józef Zasadziński, Buntoro, Klaus Müller, and Jeffrey Fluhrer 191

Numerical Simulation of Behavior of Weld-Pocket Dies during Extrusion of Thin-Walled Solid Sections

Igor Duplancic, Zeljan Lozina, Dar Kostovic, Jere Prgin, and Zoran Bracic 199

Consideration of Surface Formation and Cracking and Control by Isothermal Extrusion; Simulation of These Factors by the Finite Element Method (FEM)

Xavier Velay, Terry Sheppard, and Xinjian Duan 209

Evaluation of a New Finite Element Method (FEM) Criterion for Seam Welds Quality Prediction in Aluminum Extruded Profiles

Lorenzo Donati, Luca Tomesani, and Vincenzo Giacomelli 221

3-D Finite Element Method (FEM) Simulation System for Optimization of Profile Extrusion

Nikolai Biba, Sergei Stebunov, and Andrey Lishny 237

Integration of 3-D Finite Element Flow Modeling in Extrusion Tool Conception and Fabrication

B. Bourqui, Y. Krähenbühl, and N. Fiétier 241

PRACTICAL DESIGN

Die Design - The Next Generation

Rick Liscomb 247

The Effect of Die Type and Die Design on Heat Generation and Productivity when Extruding AlMgSi Alloys

Gregory Lea and Chris Jowett 251

Integrated Computer-Aided Extrusion Hollow Die Design Methodology

Yean-Jenq (Henry) Huang 261

Introducing Simulation Technology to Die Design	
Hidekazu Sakihama, Hirozo Michisaka, Hiroyuki Eda, and Hideyo Yamasaki	269
TECHNOLOGY IN PRACTICE	
Use of Tribology to Improve Performance and Quality in Aluminum Extrusion	
Pradip K. Saha	277
The Fixed Dummy Block	
Paul Robbins, Dennis Van Dine , Veikko I. Johannes, and Shigeyoshi Takagi	289
Die Heating in Production	
Alan Castle, and Ian Avent.....	295
The Single-Cell Die Oven	
Stephen Wasilenko, Roger A. P. Fielding, and George Macey	301
Automated Polishing and Cleaning of Aluminum Extrusion Dies	
Bill Fehl	313
Study of Cost Savings in Die Trial and Die Correction With New Inspection Technologies	
Shmaya Wallfish and Piermario Locatelli	319
Software Application for the Management of Profiles, Backers, and Bolsters	
Rafael I. Rodriguez	325
Weight Per Meter Control Through Accurate Die Aperture Size	
Hanif Hamzah	329
SURFACE TREATMENTS AND MATERIALS	
Deposition of Hard Films on Hot-Work-Steel Dies for Aluminum Extrusion	
Klaus Müller	343
CVD Coating Technology for Increased Lifetime of Aluminum Extrusion Dies	
Joachim Maier	351
Nitriding of Extrusion Dies: Problems and Solutions	
Tahar Nabil Tarfa and Andrzej Czelusniak	357
Extrud-AL™ -- An Alternative Approach to Nitrogen Die Cooling	
Richard Twigg and Robert Oesterreich	373
Modern Extrusion Die Hardening and Nitriding	
Tom Guler and Jeff Pritchard	377
Ni₃Al-Based Composites as Alternative Die Materials for the Extrusion of Hard Aluminum Alloys	
Twan J. Walstock, Jie Zhou, and Jurek Duszczyk	383
Fundamentals of Advanced Aluminum Extrusion Processes	
Józef Zasadziński, Wojciech Libura, and Jan Richert	391

VALUE-ADDED PROCESSES

Wider Extrusions at Lower Cost by Friction Stir Welding Kari Erik Lahti	399
---	-----

WELDING

Friction Stir Welding Tools and Techniques for Welding Aluminum Extrusions Wayne M. Thomas, Ian M. Norris, Edward D. Nicholas, and D. G. Staines	407
Promoting the Use of Aluminum Extrusions within the Welding Fabrication Industries Tony Anderson	417

EXTRUSION

Changes to Extrusion Application Design in the <i>Aluminum Design Manual 2005</i> J. Randolph Kissell and Michael H. Skillingberg	423
Manufacturing Process of Curved Extrusions for Aluminum Alf Birkenstock, Karl-Heinz Lindner, and Norbert-William Sucke	427
Production of High-Curved Extruded Profiles Directly During the Extrusion Process Buntoro and K.B. Müller	437
Effect of Stretching on Extrusions for Residual Stress and Distortion M.E. Karabin and R.W. Schultz	447
Industrial Experience of Caustic Soda Recovery Integrated with Automatic Die Cleaning Walter Dalla Barba and Fabio Vincenzi	453
Enhanced Tool Lubrication Systems James E. Dyla	457

FABRICATION

Manufacture of Continuously Reinforced Profiles Using Standard 6060 Billets Matthias Kleiner, Michael Schomaecker, Marco Schikorra, and Alexander Klaus	461
Improving Thermal Performance in Structural Fenestration Products Patrick Muessig	469
New Advanced Automation in Extrusion Working and Assembly Mario Conserva and Enrico Perego	475
Design and Fabrication of Aluminum Automobiles Frank G. Armao	483
A CNC Machining Center for Processing Aluminum Profiles for the Train Industry Giovanni Barbareschi	489

ANODIZING

Outdoor Exposure Performance of Anodized Finishes

Barry Ellard 497

A New Economic Two-Step Coloring Process for Bronze and “Stainless Steel” Colors

Walter Dalla Barba and Fabio Vincenzi 507

Anodized Architectural Aluminum Combined with an Organic Seal

Richard Porosky, Michael Turner, Douglas Penn, and Tsutomu Ito 517

PAINT-BASED FINISHES

Chrome-Free Pretreatment: A Cost-Effective Solution to the Elimination of Environmental and Workplace Concerns Surrounding Chromium

Charles R. Ike 525

Decoral System: for the Decoration of Extruded Aluminum Profiles

Enrico Piva 529

Process Control and Data Acquisition for Pretreatment Washer Systems Utilizing Computerized Graphics

Timothy E. Fudge 537

GLOSSARY 543
