

VOLUME I TABLE OF CONTENTS

EXTRUSION EQUIPMENT

Non-Destructive Examination Components

Ronald Manganello and Alyssa Porter

Measurement & Diagnostics

Unique Tool Matching System

Georgi Marinov, Yavor Djonev and Krassimir Bozhkov

Diagnostics and Experiences on Extrusion Press Tooling

Werner Hähnel and Klaus Gillmeister

New Measurement System for Quality Control

Georgi Marinov, Yavor Djonev, Krassimir Bozhkov and Vladimir Vladimirov

Press

Seven Steps for Selecting An Extrusion Press

Al Kennedy

Comprehensive Extrusion Automation for Iso-thermal Iso-speed Extrusion with Guaranteed Cooling Rate

Madhukar Pandit, Thomas Heger and Heiko Hengen

Innovative Tube Extrusion Plant for Aluminum Alloys

Uwe Muschalik

Clean Oil: The Lifeblood of the Modern Extrusion Press System

Robert Drake and Ted Versteeg

Second-Generation Combination Quenches: Improving the Theory and Practice

David Jenista

Profile Aging Systems: Traditional, Semi-Continuous, Continuous—Differences, Advantages, Costs

Mauro Spizzo

Control

Automatic Closed-Loop Control Comes of Age for Aluminum Extrusion

Bill Barron

Process Controlled Containers – Smart Containers

Wolfgang Eckenbach

Water Hydraulic Press Control

Steve DeMar

Container & Tooling

Extrusion Container Technology from Yesterday until Tommorrow

Wilfried A. Kortmann

Performance Enhancement of Tool Lube Systems

James Dyla

Automated Die-Polishing Update

John Stackhouse

Abrasive Flow Machining

Jim Lundstedt and Lawrence Robbins

Billet/Log Heating/Handling

New Conveying System in Rapid Gas-Fired Heaters in Combination with Hot Log Shear or Log Welder and Hot Log Saw

Willi Johnen

Operational Experience of a Highly Efficient Induction Billet Heater: Improving Energy Efficiency with Superconductivity

Larry Masur, C. Bühner, J. Kellers, C. Fülber, A. Steinhauer, I. Hahn and W. Witte

Building a 200 kW Rotating Billet Superconducting Induction Heater

Niklas Magnusson, Magne Runde, Stefan Dappen, Artur Dobosz, Peter Blau, Gerhard Kalkowski, Giovanni Grasso, Risto Mikkonen, Zdenek Jelinek, Bernard Nacke, and Tomasz Stuczynski

Sawing

Hot Billet Saw: a Real Innovation in Handling Equipment

Marco Spallarossa

Sawing Hot Billets at the Extrusion Press

David Turnipseed and Michael T. Kohn

EXTRUSION/DIE, PRACTICAL

Scrap Allocation

Chris Jowett, Johnie Adams, Chris Daughetee, Greg Lea, Oliver A. Huff and Norm Fossil

Extrusion Surface Effects Resulting From Billet Surface Inflow

William Dixon

Recovery Improvement

Extrusion Defects - Streaking

Shigeyoshi Takagi and Hanif Hamzah

Effects of Process Conditions on "Die Pick-Up" Formed During Extrusion of Aluminium Alloy AA6060

R. Peris, Z. W. Chen, T. Pasang, C. Hand, S. Chen, B. Hayward and J. Mainwaring

Extrusion Process

Implications and Influence of Complex Extrusions and Non-Standard Shapes on the Extrusion Press Productivity

Modar Mohammed Al Mekdad, Syed Feroze and Sutanay Parida

Process of Achieving Extrusion Excellence

Srimay Basu and Sultan Al Sabri

Boron Nitride – Solutions for Aluminum Extrusion

Christiane Klöpfer

Simulation-Aided Extrusion: An Efficient Optimization Strategy

Y. Krähenbühl and B. Bourqui

Tooling Performance

The Use of Gaseous Nitrogen to Improve the Surface Finish of Dilute 6xxx Extrusions

Martin Fortier, Dominique Lavoie, Nick Parson, and Chris Jowett

Butterfly Dies – Increase Extrusion Speed through Innovative Porthole Die Design

Tommaso Pinter

Metal Flow in Extrusion with Different Orifices

Seiichi Nagao and Norio Takatsuji

Gas Nitriding Versus Ferritic Nitrocarburizing in Surface Hardening of Extrusion Dies

George J. Tymowski and Achilles Nikopoulos

The Die Does Not Make the Extrusion

Paul Robbins

Die Performance Optimization through Understanding of the Surface Features of Fatigue Fractures

Pawel Kazanowski

The Case-Based System for Aluminum Extrusion Die Design in a Context of Integrated Design

Chaiwat Noomtong, Suthep Butdee and Serge Tichkiewitch

Extended Die Life and Consistent Weight Per Foot Using BC-115 Inserted Tooling

Paul Nolting and Gary Dion

Extrusion Die Specification: How to Obtain Repeatable Performance

R. F. Dickson and A. Kindlihan

Quench and Temper

Progressive Quenching: A New Approach to Distortion Control

David Jenista

The Development of a High Performance Product Created Through the Combination of Metallurgical Technology, Process Control and Lean Manufacturing

Ray Parkinson

Quench Sensitivity Test Method for Aluminum Extrusion Alloys

Elizabeth D. Sweet, Benjamin R. Harker, Xinquan Zhang and Malcolm J. Couper

Two-Step Aging Behaviors of Al-Mg-Si Alloy Extrusions

Hidenori Hatta, Shinichi Matsuda and Hideo Yoshida

Hollow Profiles and Heat Exchanger Profiles

Static and Dynamic Mechanical Properties of Longitudinal Weld Seams in Industrial AA6060,

AA6082 and AA7020 Aluminium Extrusions

Andrew J. den Bakker, Simon-Peter Edwards, Ludmila 't Hoen-Velterop and Rens Ubels

Quality Issues of Hollow Extrusions for Aerospace Applications

Pradip K. Saha

Seam Welds Modeling and Mechanical Properties Prediction in the Extrusion of AA6082 Alloy

Lorenzo Donati and Luca Tomesani

Experimental Study of Longitudinal Weld-Seam Properties in Tubular AA6060 and AA6082 Extrusions

Andrew J. den Bakker, Wim H. Sillekens and Robert J. Werkhoven

Seam Welds Quality in AA6060 Alloy

Lorenzo Donati, Luca Tomesani, Vincenzo Giacomelli and Stefano Andreoli

Development of Latest Heat Exchanger Tube Technology

Kimihisa Hiramoto, Shigenari Minami and Hidekazu Sakihama

Optimizing AA3003 for Extrudability and Grain Size Control

Nick Parson and Ram Ramanan

MANAGEMENT ISSUES

Continuous Extrusion Optimization System

Craig Werner and Richard Kelly

Operations Management

A Two-Decade Case Study – How Modeling Drove Exceptional Results

Craig Werner and Richard Kelly

Implementation of Six Sigma Methodology in the Extrusion Die Shop

John A. Funai

Quality Management

Customer Focus on Quality Control of Extruded Products

Hanif Hamzah

Can Quality Production be Achieved Consistently on All Shifts?

Randy Long

Recovering Recovery

K.S. Dathathri, Rajat Agarwal and Utsav Agarwal

Scrap... The Most Expensive Thing We Do

James H. Scheuing and John A. Funai

Market

Increasing the Use of Extrusions for Electrical Applications Technical and Economic Considerations

Peter Pollak

The Evolving Heat Exchanger Market for 3xxx Series Extrusions

Martin Hartlieb

Upcoming Structural Design Rule Changes Impacting Aluminum Extrusions

J. Randolph Kissell and Michael Skillingberg

Globalization

Development of Recycling-Friendly Aluminum Alloys for Extruded Products

Subodh K. Das, John A.S. Green, and J. Gilbert Kaufman

The Globalization Trap of the Aluminum Extrusion Industry

Bruno G. Ruettimann

Indian Aluminum Extrusion Industry – Challenges and Opportunities

Sudarshan S. Chokhani

The Role and Use of Aluminum in “Green” Architecture

Joanna Biedronska and Wojciech Z. Misiolek

VOLUME II TABLE OF CONTENTS

BILLET PROCESS and EQUIPMENT

[Al-Mg-Si Alloys with Improved Crush Properties](#)

Jostein Røyset, Ulf Tundal, Oddvin Reiso and Trond Furu

[Alloy Development](#)

[The Future of 6xxx Medium Strength Structural Applications](#)

Jonathan Pangborn, Eskild Hoff, Richard Dickson, Oddvin Reiso, Ulf Tundal, and Chris Devadas

[New Generation of Matte Alloys from Alcan](#)

Ram Ramanan and Nick Parson

[Metal Quality](#)

[Metallurgical Quality of Aluar Billets, Ten Years of Increasing Quality](#)

María Victoria Canullo and Rodolfo Acuña Laje

[Cl₂-Free Aluminium Processing Technologies](#)

Bruno Maltais, Dominique Privé and Étienne Tremblay

[Degassing Technology: a Review of Design and Operational Considerations for Effective Removal of Hydrogen In Molten Aluminum](#)

David J. Shoemaker

[Improved Hydrogen Measurement In Molten Aluminum and Aluminum Alloys](#)

D. Corleen Chesonis, Todd M. Gansemer, Brian C. Reynolds and Jim N. Hart

[Metallurgy](#)

[Effect of Alloy Chemistry and Process Parameters on the Extrudability and Recrystallization Resistance of 6082 Aluminum Alloy](#)

Jostein Røyset, Mona Marstrander Rødland, Ulf Tundal and Oddvin Reiso

[The Effect of Scandium and Zirconium Additions on Aluminum Extrusion and Post-Braze Grain Structure](#)

Frank F. Kraft and Cory Williams

[Standardization in Metal Analysis - No Longer an Option](#)

Denis Choquette

[Furnaces](#)

[Electromagnetic Stirring for Aluminum Furnaces](#)

A. Johansson, Olof Sjöden, C. Carlsson, and R. Stål

[O₂ Enhanced Combustion for Aluminum Melting Furnaces](#)

Stewart Jepson and Peter VanKampen

[The Art of Dross Management- Maximizing Dross Values and Minimizing Dross Generation](#)

James Herbert, David Roth and Martin J. Collins

Dross Reduction In the Aluminum Casthouse: General Considerations and Practices

Peter D. Waite

Casting Homogenization

Understanding Key Factors to Improve Billet Surface Quality and Casting Mold Life

Jean-Philippe Dubé and Ghislain Gaudreau

Advanced 6xxx Alloys – Challenges in Casting and Extrusion Process

J.D. Schloz

Measurements and Modeling of Precipitation and Dissolution during Cooling and Preheating of Extrusion Billets

Børge Holme, Sylvain Gouttebroz, Calin Marioara, Bjørn Rune Henriksen and Kristina Lewin

EXTRUSION/DIE, THEORETICAL

Control of Asymmetric Recrystallization in Single and Multi-Hole Die Extrusion

Zhi Peng and Terry Sheppard

Microstructure

Influence of Geometric Dynamic Recrystallization in the Dead Metal Zone on Peripheral Coarse Grain Defect Formation in Indirect Extrusion

Alexander Bandar, William Van Geertruyden and Wojciech Z. Misiolek

Prediction and Control of Subgrain Size in the Hot Extrusion of Aluminum Alloys with Feeder Plates

Xavier Velay and Terry Sheppard

Innovative Methodologies to Increase Productivity by Simulating Development of Structure During Extrusion and Solution Soaking

Terry Sheppard

Grain Size Prediction in AA6060 Profile Extrusion

Lorenzo Donati, Luca Tomesani, Marco Schikorra and A. Erman Tekkaya

A Review of Recrystallization Mechanisms as Related to Complex Forgings Produced from Extruded 6061 Forging Stock

Robert A. Matuska

Modeling and Simulation

Simulation and Experimental Investigations on Composite Extruded Processes

Marco Schikorra, Michael Schomäcker, Thomas Kloppenborg and A. Erman Tekkaya

Thermomechanical Simulation of Continuous Extrusion

Xavier Velay

Application of Qform Program for Improvement of the Die Design and Profile Extrusion Technology

Nikolay Biba, Sergey Stebunov and Alexey Vlasov

3-D Numerical Simulation of Direct Aluminum Extrusion and Die Deformation

W.A. Assaad, H.J.M. Geijselaers and J. Huétink

Flow Front Tracking Simulations in Aluminum Extrusion Dies Using an Eulerian Description and a Comparison with Experiments

A.J. Koopman, H.J.M. Geijselaers, J. Huétink, K.E. Nilsen and P.T.G. Koenis

Advanced Numerical Techniques to Simulate Extrusion

Y. Krähenbühl, N. Fiétier and M. Deville

Process Engineering Modeling a Ticket to Higher Efficiency In Aluminum Extrusion

Wojciech Misiolek and Richard M. Kelly

Neural Networks

Analysis of Mechanical Properties of 2xxx T3 and T8 Aluminum Extruded Rods by Means of Neural Networks

Igor Duplancic, Branimir Lela, Frane Vlak and Jere Prgin

Use of Adaptive Neural Networks (ANN) In the Aluminum Extrusion Process Control

Rodrigo Camargo Campana and Ronald Lesley Plaut

Dies and Modeling

Extrusion Simulation as the Way to “Close the Loop” In Die-Design

Tiziano Andreoli

Indirect Extrusion of Rapidly Solidified Al-Base Alloy Powder/ Flakes and Deformation Behavior of the Extrudate

Soeren Mueller, Klaus Mueller and Manoj Kumar

Die Design and Manufacturability Formalization Using the Medial Axis Transform

Gijs van Ouwerkerk, Tom Vaneker, Fred van Houten, Kjell Nilsen and Peter Koenis

Biomechanics In Extrusion Dies! Finding a Proper Web Cross-Section in Porthole Dies Regarding a Fish Body

Hoda Pourvali and Ebrahim Pourvali

Lifetime Comparison of Different Hot Work Tool Steels for Extrusion Tools in Aluminium Extrusion

Christof Sommitsch, Friedrich Krumphals, Christoph Stotter, Dominik Dendl, Thomas Wlanis, Daniel Huber and Christian Redl

Metal Flow, Weld Seam, Modeling

Solid–State Bonding in Longitudinal Weld Seam Formation

Andrew J. den Bakker, Simon-Peter Edwards and Jie Zhou

Extrusion Benchmark 2007 – Benchmark Experiments: Study on Material Flow Extrusion of a Flat Die

Lorenzo Donati, Luca Tomesani, Marco Schikorra and A. Erman Tekkaya

VALUE-ADDED PROCESSES

Mechanisms of Streaking on Anodized 6xxx Series Extrusions

Xinquan Zhang, Hanliang Zhu, Arne K. Dahle and Malcolm J. Couper

Customers

Hybrid Nanostructure of the Anodic Oxide as an Alternative Finish for Extrusions:A Case Study

J. Runge, L. Macklin and R. Bader

Friction Stir Welding of Aluminium Alloy Extrusion Panels for NZ Navy Inshore Patrol Vessels Building

Z.W. Chen, T. Pasang, B. Donovan and R. Morgan

Decoral System: for the Decoration of Extruded Aluminum Profiles

Enrico Piva

Thermal-Efficient Products Through Computer Simulation Software

Patrick M. Muessig

Filiform Corrosion and Results of 10 Years Natural Weathering

Judith Pietschmann and Roswitha Gardein

Metal Forming

Retrogression Heat Treatment as a Means of Improving Formability of Aluminum Extrusions

Joseph C. Benedyk

Flexible Extrusion of 3D-Curved Profiles for Structural Components

Dirk Becker, Marco Schikorra and A. Erman Tekkaya

A New Advanced Profile-Shaping Technique for Design and Manufacturing of Automotive Components

Ola Jensrud and Thorbjørn Høiland

Anodizing

Innovative Anodizing and Coating Technologies for Processes and Plants of the Future

Walter Dalla Barba

Chemical Depth Profiling of Anodized Extrusion Surfaces Using rf-GD-OES

Thomas Björk and Jan-Olov Nilsson

Paint

A Safer Alternative to Chromate Passivation for Aluminum Pretreatment

Nabil Zaki

Choosing the Best Coating Solution for Aluminum Extrusions

James Lawley

Comparative Study of Electrostatic Applicators for Vertical Powder Paint System. Traditional Multi-Gun Applicators Versus the Single Over Flow Bed (O.F.B.) Disk System

Carlo Zucchetti

Automatic & Self-Cleaning Booth for Vertical Powder Coating Lines

Luca Dalla Vecchia

In-Line Paint Stripping of Hooks

Paola Zavattoni and Casale Litta

A Non-HAP (Hazardous Air Pollutant) Coating for Extruded Aluminum

Donald J. Algrim, Tracy Jean Rajala and David E. Lindow

Fabrication

Aluminum Extrusion Fabrication Solutions for the Automotive & Transportation Markets

Giovanni Barbareschi

Codes and Standards for Aluminum Welding

Tony Anderson and Peter Pollak

Packaging

Process Control and Data Acquisition and Its Direct Impact on Plant Wide Operational Excellence

Timothy E. Fudge

Managing Your Product from Your Dock to the Customer's Dock

Raffaele D'Andrea

New Solutions for Packaging Extrusions

Tommy Gallimberti
